The scope of services of FEIG ELECTRONIC GmbH covers a product documentation in German and English language, whereby the product documentation in English language is available via download. We would like to stress the fact that shipments to your customers must include appropriate documentation for both the final product and intended use must be enclosed and that legal regulations may apply which expressly require documentation in the language of the country of destination, for example the Machinery Directive. It is your responsibility to check whether it is mandatory by law to translate said documentation into the respective national language and, in the event of such a mandatory regulation, to include documentation in the national language of the respective target country in the shipments to your customers.
